Sealed data acquisition system for harsh environments

imc CRONOS-SL

The ideal solution for electromechanical testing in extreme environments

Measurements performed under harsh environmental conditions, such as extreme hot and cold temperatures, water spray, and intense vibration, require appropriately protected test equipment. The imc CRONOS-SL is designed to maintain its full precision, dynamics and flexibility even when operating in the toughest environments.

Measurement amplifiers are individually configured at build time. imc CRONOS-SL is a system tailored to your needs for direct connection of virtually any signals and sensors. The two available housing sizes can be equipped with 2 or 4 modules from a broad selection of versatile and universally applicable I/O options.

They not only comprise full analog input conditioning and filtering - additionally any measurement channels can be subjected to freely defined real-time calculations and analysis directly within the system.

In conjunction with extra digital I/O and analog outputs,

these real-time processing capabilities even allow for

open and closed loop control tasks or responsive limit

FlexRay, etc.) can also be integrated: decoded according

monitoring. Field and vehicle bus logging (CAN, LIN,

imc CRONOS-SL-4

imc CRONOS-SL: prepared to meet tough challenges

Extreme conditions

- Operating temperatures -40°C to +85°C
- Ingress protection rating IP65
- Condensation allowed
- · Shock resistance: MIL STD810F
- Power supply: 10 to 32 V DC

Immediate results

- Real-time calculations already performed onboard the system (imc Online FAMOS)
- Local data reduction
- Directly control the progress of the test and immediately react
- Limit monitoring with real-time response
- Open and closed loop control (incl. PID)
- Easily configurable with productive operating software: imc STUDIO

Maximum security

- Redundant or autarkic data storage onboard the system
- Integrated UPS prevents any loss of measurement data during power failure
- Automatic self-start after power failure
- Reliable industrial grade system, real-time capable without PC
- Intuitive operating software imc STUDIO keeps full control and minimizes handling errors

Autonomous and mobile

- PC independent
- Robust wide range power supply with battery backed UPS
- Unmanned automatic self-start upon power-up
- Decentralized network capability
- WLAN, GPRS, EDGE, 3G, 4G, LTE capable
- Compact design

In Practice

The ideal system for demanding environments

imc CRONOS-SL is an extremely rugged, mobile measurement system for test challenges in harsh environments. Complying with the standard MIL STD-810F, it is ideally suited for use on demanding test tracks or on machinery. The system works reliably where commercial electronics would fail; it can be operated autonomously and works independently of a PC. Captured data are stored within the system on an internal hard drive or removable CF-cards, ensuring seamless and safe data storage. If direct live display of measured data is desired, the PC is not the only option: the TFT graphical terminal is an excellent alternative.

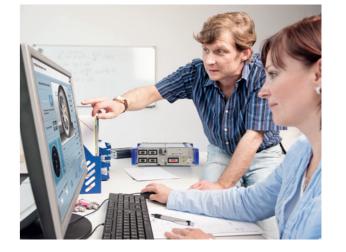

As close as remote can be

Imagine your test vehicles are in Alaska and your office is in Munich. With the combination of imc CRONOS-SL and the software solution imc LINK, there's no reason to catch a cold. Thanks to this imc solution, you'll always have an accurate overview from your office how measurements are proceeding and you can take appropriate actions from your location if necessary. imc LINK is designed specifically for remote access to measurement systems and ensures a secure, automated data transfer from measuring devices, regardless if connected to a PC or not. With the blackbox functionality of the robust imc CRONOS-SL, your data are always backed up.

Intuitive operating software: imc STUDIO

The imc CRONOS-SL is operated by imc STUDIO – the same intuitive software users know from all other imc data acquisition systems. imc STUDIO offers a complete test and measurement workflow environment with an emphasis on productivity in measurement configuration and test development. From quick and simple data capture tasks, to fully automated durability tests, imc STUDIO is based on over 20 years of experience, with one single goal in mind: improve your testing productivity.
